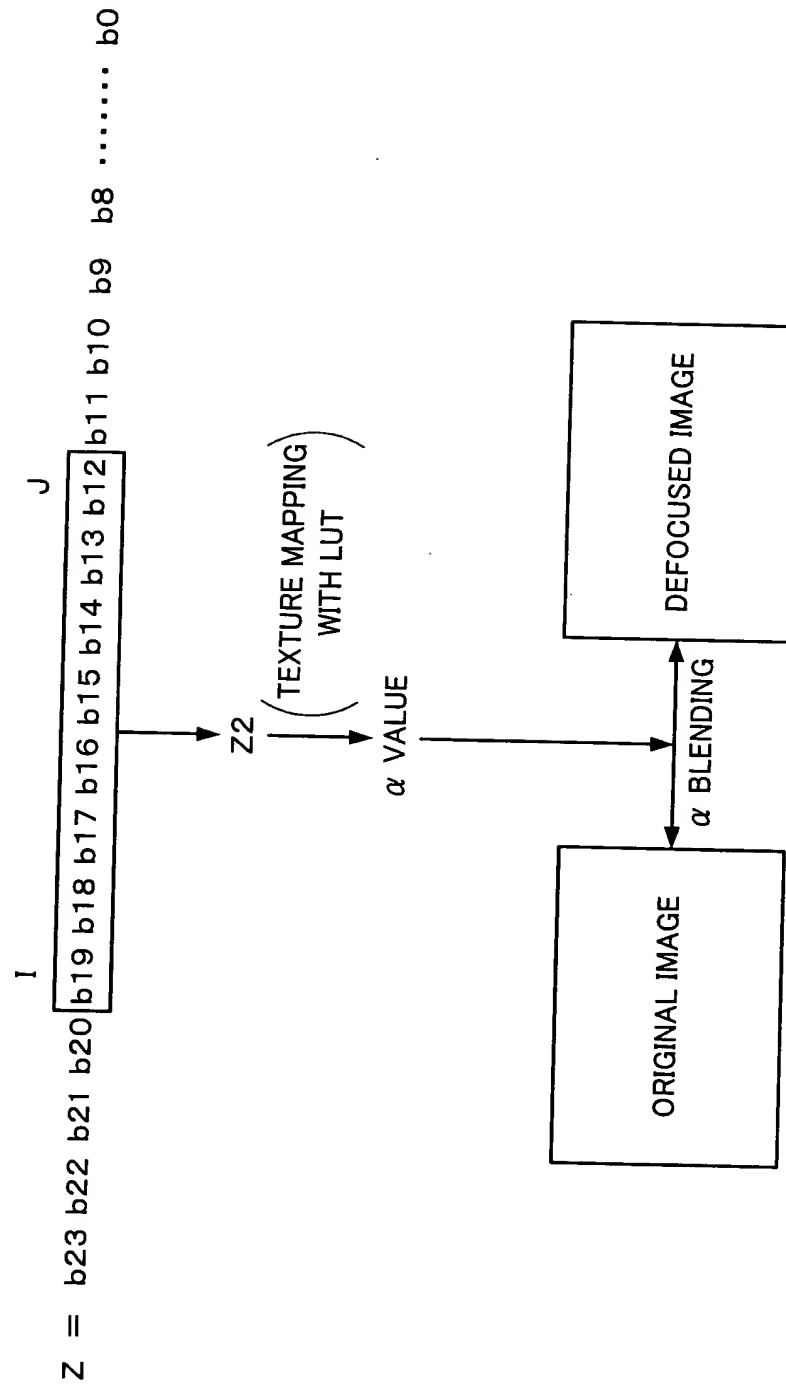

FIG. 14

A diagram illustrating a perspective view frustum. The frustum is defined by two lines converging at a point on the right, representing the viewer's eye. A vertical line segment labeled '10' is positioned at the base of the frustum. A horizontal line segment labeled 'OB1' is located within the frustum. A vertical line segment labeled 'OB2' is positioned to the left of the frustum. A vertical line segment labeled 'OB3' is positioned further to the left. A vertical line segment labeled 'OB4' is positioned at the far left. A vertical line segment labeled 'SC' is positioned to the left of the frustum. A vertical line segment labeled 'NEAR CLIPPING' is positioned to the left of the frustum, with a double-headed arrow indicating the distance from the viewer's eye to the near clipping plane.
